Thanks, Sherry. There's someone else in RD or SRRD that has been working on rodenticides. He had contacted me a few times to help on outreach and also to involve HUD in the mitigation decision. I can't remember his name though. Laura Parson will know the new point person. Copying Laura, Kevin and Darlene.

Hi Cyndy,

My recommendations would be Kevin Sweeney from our Registration Division; however I'm also cc'ing Frank and Thomas as they might be able to be of further assistance to you. Kevin has worked closely with the National Pest Management Association and other industry trade associations in providing expertise on the registration and issues surrounding rodenticides. Kevin's contact information is: Sweeney.kevin@epa.gov and his phone number is: 703-305-5063.

Best,

Sherry

Sherry,

Do you happen to know if there is a contact in pesticides who works or provides expertise on rodenticides for healthy homes? I am going to be assuming the healthy homes work after Kathy retires and I am putting together a list of contacts related to healthy homes.

Thanks,

Cyndy
